

SIAVASH MEHRPOUYA | PMP

Technical Project Manager | Development Manager

North Vancouver, BC | Siavash.mehrpouya@gmail.com | +1 (604) 906-6043 | [LinkedIn Profile](#)

PROFILE

PMP-certified Development Manager and Technical Project Manager with 5+ years of experience leading cross-functional software development initiatives across engineering, product, QA, business, and vendor teams. Experienced in driving Agile delivery, coordinating production releases, managing dependencies, removing execution blockers, and enabling predictable delivery across multiple concurrent initiatives. Recognized for building collaborative partnerships, improving delivery processes, and aligning technical execution with business objectives. Leverage generative AI to streamline planning, documentation, stakeholder communication, and team collaboration, enabling more efficient software delivery.

CORE COMPETENCIES

- Development Management
- Technical Project Management
- Agile Software Delivery
- Software Development Lifecycle (SDLC)
- Sprint & Release Planning
- Cross-functional Leadership
- Backlog & Roadmap Management
- Production Release Coordination
- Risk, Issue & Dependency Management
- Stakeholder Management
- Project Governance
- Delivery Planning & Execution
- Process Improvement
- Team Collaboration
- Executive Reporting
- Business & Technical Communication
- AI-assisted Project Delivery
- Jira, Scrum & Kanban Delivery

KEY HIGHLIGHTS

- Led cross-functional software development initiatives across engineering, product, QA, business, and vendor teams.
- Successfully managed up to 4–6 concurrent initiatives while balancing scope, schedules, priorities, risks, and dependencies.
- Coordinated production releases, deployment readiness, and cross-team delivery execution.
- Strengthened delivery governance through RAID management, executive reporting, and stakeholder alignment.
- Improved delivery predictability, collaboration, and execution through continuous process improvement and AI-assisted project management.

PROFESSIONAL EXPERIENCE

Carbon — Vancouver, Canada

Technical Project Manager – Software Delivery | 2023 – Present

- Lead cross-functional software development initiatives across engineering, product, QA, business, and vendor teams while managing 4–6 concurrent projects.
- Drive software delivery from planning through production release by managing scope, change requests, schedules, priorities, risks, and cross-functional dependencies.
- Lead teams of 6–10 contributors, proactively removing execution blockers and enabling predictable delivery across concurrent initiatives.
- Partner with Product Owners, business stakeholders, and client teams across 5–6 business functions to translate strategic objectives into prioritized backlogs, delivery roadmaps, executable plans, and Statements of Work (SOWs).
- Develop and maintain delivery roadmaps, project schedules, milestones, and implementation plans using Jira, Advanced Roadmaps, and Microsoft Project.
- Establish delivery governance through RAID management, executive reporting, stakeholder communication, and proactive risk mitigation while maintaining alignment among 6–12 key stakeholders throughout project execution.
- Coordinate release planning, production deployments, and go-live readiness across approximately 7–8 software production releases.
- Leverage generative AI to streamline planning, documentation, meeting summaries, stakeholder communication, and delivery coordination, reducing administrative effort while improving team productivity.
- Drive continuous improvements by applying Agile Scrum and Kanban practices to strengthen delivery visibility, enhance collaboration, and improve execution consistency across multiple concurrent initiative

Carbon — Dubai, UAE

Project Manager – Digital Platforms & Systems | 2020 – 2023

- Managed 2–3 concurrent software delivery initiatives with project budgets ranging from \$100K–\$300K, including budget monitoring and financial tracking.
- Led cross-functional engineering, QA, product, operations, business, and vendor teams of 6–10 contributors.
- Directed software delivery across 6–9 month initiatives by balancing priorities, risks, dependencies, and stakeholder expectations.
- Developed delivery plans, roadmaps, schedules, and milestones that aligned technical execution with business priorities.
- Partnered with business stakeholders and client teams to define scope, priorities, requirements, success criteria, and delivery objectives.
- Established delivery governance through RAID management, executive reporting, and proactive risk mitigation.
- Coordinated third-party vendors while maintaining alignment across engineering and business teams.
- Recovered at-risk initiatives by improving collaboration, resolving delivery challenges, and realigning priorities.
- Improved delivery visibility through dashboards, milestone reporting, delivery forecasting, and executive updates.

Korek Telecom — Middle East

Project Assistant / Coordinator – IT & Technical Projects | 2017 – 2019

- Supported the delivery of telecommunications and infrastructure initiatives valued at over \$1M while coordinating engineering, operations, contractor, and vendor activities.
- Progressed from Project Coordinator to Assistant Project Manager before leading a small project as Project Manager.
- Supported project planning, scheduling, documentation, procurement, and day-to-day delivery across multiple initiatives.
- Coordinated external contractors, vendors, and cross-functional teams of up to 15 contributors.
- Facilitated communication across engineering, business, contractors, and vendors to maintain delivery schedules.
- Tracked project progress, risks, issues, and dependencies while supporting timely resolution.
- Supported deployment and vendor coordination activities for telecommunications and video streaming solutions.
- Led the planning and delivery of a small project under senior leadership guidance.

Early Project Management Experience (2014 – 2017)

Project Assistant / Coordinator – IT & Technical Projects

- Supported Project Managers with planning, scheduling, documentation, and day-to-day coordination across multiple initiatives.
- Assisted with stakeholder communication, progress reporting, and cross-functional collaboration to support project delivery.

EDUCATION & CERTIFICATIONS

- Project Management Professional (PMP)
- Generative AI for Project Management (In Progress)
- Working as a Scrum Master (In Progress)
- Master of Science (M.Sc.), Structural Engineering
- Bachelor of Science (B.Sc.), Civil Engineering
